

### Winter fun at Schwanner lift

The Schwanner lift gives access to the sunny slopes directly behind our guesthouse. The skilift is ideal for families with children as well as beginners. Our many regular guests appreciate especially the resort's child and family friendliness along with the excellent conditions for beginners.

The preparation of the slopes is superb and the lift staff experienced, especially in dealing with children. With a friendly and helpful attitude they assist beginners in learning how to use the skilift and to get the most enjoyment out of their skiing experience.

The slopes are sunny, not too steep and open, making it the ideal practice area for children. The ski school area (with a "magic carpet") is situated directly next to the restaurant in the flatter parts of the slopes.

For the Schwanner lift day and half-day passes are available, as well as tickets for our "point system", which is especially useful for families with children.
